VAGINAL SUPPOSITORIES

NON-CAUSTIC

NON-IRRITATING

These Suppositories supply the antiseptic action of chlorine, in a most convenient and effective form. Prompt antiseptic action of the chlorine assures rapid effects in the vaginal canal, without harmful action upon the delicate membranes.

By use of these Suppositories, irritations are opposed and the vaginal tract deodorized.

DIRECTIONS FOR USE

After placing the Suppository in the vagina, apply pressure with the finger until it is well inserted. The germicidal agent is released immediately on contact with vaginal fluids. It is not intended that they should completely dissolve.

In very warm weather immerse vial in cold water for a few minutes before using.

IT IS generally conceded that a safe, powerful antiseptic is essential to the modern practice of feminine hygiene, and as a local application for irritated conditions of the vagina.

For this purpose, Zonite Liquid is widely known and used. Its active principle is the ideal agent for application to the delicate tissues of the human body. It is an active, powerful antiseptic, non-caustic, non-irritating and entirely without injurious effect upon human tissues in all its indicated uses.

Zonite Vaginal Suppositories now present the same antiseptic principle (active chlorine) in a convenient form for vaginal use. These suppositories serve as a potent agent for use in all conditions of the vagina requiring an effective antiseptic.

The physiological properties of Zonite Suppositories tend to stimulate the natural secretions without any injurious effect upon the body cells.

Zonite Suppositories release their germicidal agent immediately upon contact with the vaginal fluids. **IT IS NOT INTENDED THAT THEY SHOULD COMPLETELY DISSOLVE.** They do not deteriorate or harden. They do not irritate the vaginal mucosa, impair its sensibility or arrest its secretion. They are efficiently deodorant.

The character of the base employed in these Suppositories is far superior to cocoa butter or any other greasy or fatty substance.

Indicated in all vaginal conditions requiring a prompt acting, powerful antiseptic.

DIRECTIONS FOR USE

After placing the Suppository in the vagina, apply pressure with the finger until it is well inserted. In very warm weather immerse vial in cold water for a few minutes before using.
