HOW WE CAN SERVE YOU.

AN
EXCLUSIVE
AGENCY.

Birth Control and Contraceptives

The necessity for rational Birth Control is recognised by all intelligent men and women, but the *safe practice* is not so well understood. Enormous quantities of inferior goods are now being placed before the Public, a great proportion of which are quite ineffective in achieving their object.

20th Century Business

The ROBILTON COMPANY is an Agency devoted solely to the supply of contraceptives of PROVED WORTH & RELIABILITY. To maintain the highest standard of quality every article listed is manufactured under a strict guarantee and also subjected to careful inspection by the Company as an additional precaution.

The Danger and ———

Under no circumstances can business be done in Drugs or Pills—unanimously condemned by leading Medical Authorities as absolutely useless and in many cases harmful. Neither are SECOND-RATE goods supplied as their unreliability involves a CONTINUAL RISK OF FAILURE.

The Robilton Company—An Exclusive Agency.

The Safeguard

Clients of the Robilton Company can implicitly rely on the fact that they are dealing with a firm of repute, and one whose interests are identical with their own, *i.e.*, The SAFE REGULATION of FAMILIES by LEGITIMATE, APPROVED and HYGIENIC METHODS. This List contains only thoroughly trustworthy articles.

Privacy

The business is essentially of a private and delicate nature and experience conclusively proves that clients prefer to deal DIRECT with a firm specialising in such goods. The publicity attendant upon purchases at Chemists, etc., can be avoided by Mail and confidential information, usually impossible in a busy shop, is obtainable without difficulty.

Corres-

pondence—which should be confined to contraceptive matters only, is dealt with by a competent Staff. Ladies please mark envelopes "L" Dept. Gentlemen, "G" Dept. Strict privacy guaranteed.

Please note that no inferior articles are sold under this Seal. Cheaper can be purchased elsewhere but in a matter of such vital importance—

Is It Worth While?

Order Number.	DESCRIPTION	Price.
1	Dutch Mesinga Pessaries. — Made in eighteen sizes, 47½ - 50 - 52½ - 55 - 57½ - 60 - 62½ - 65 - 67½ - 70 - 72½ - 75 - 77½ - 80 - 82½ - 85 - 87½ and 90 m/m diameter. Is considered one of the best methods for women, but to ensure that the correct size is obtained it should be fitted in the first instance by a doctor or nurse.* <i>It is important to state size when ordering</i>	5/-

CASH with order. All prices quoted include postage in Great Britain only. British Dependencies and all Foreign postage extra (see separate list).

Postal Orders need not be registered provided they are made payable to the Robilton Company *and crossed*. Treasury Notes should be registered.

If goods are not received within three days please communicate immediately, giving full particulars.

OF SPECIAL INTEREST

A Unique Recommendation

The Malthusian League, a voluntary Society which has devoted over 50 years unceasing work to the great cause of "Human Welfare through Birth Control" and which numbers amongst its Vice-Presidents many names honoured in the world of Medicine, Science, Literature and Politics—expresses its approval of the aims and principles of the Robilton Company as follows :—

"THE COUNCIL OF THE MALTHUSIAN LEAGUE, WHILE HAVING NO FINANCIAL INTEREST OR OTHER CONNECTION WITH THE ROBILTON COMPANY, HAS EVERY CONFIDENCE IN MR. A. E. OWEN, THE MANAGING DIRECTOR OF THAT COMPANY, AND THEREFORE HAS NO HESITATION IN RECOMMENDING THIS FIRM TO ALL WHO DESIRE TO PURCHASE RELIABLE CONTRACEPTIVES AT A REASONABLE COST."

An authoritative declaration such as this is sufficient proof that

You are Safe

in dealing with the Robilton Company.

THE ROBILTON COMPANY

An exclusive Agency for the supply of genuine
contraceptives.

¶ The necessity for a rational limitation of families in accord with economic needs of parents is now recognised by all intelligent men and women. Its safe practice however is not so well understood and appliances are frequently bought which are not only ineffective but often harmful in use.

¶ This Agency was formed some years ago with the object of supplying contraceptives only of *proved* worth and reliability. A particular feature—and one which has always been rigidly adhered to, is its policy of *individual examination* of any article sold (other than sealed proprietary goods).

¶ The importance of this rule is obvious. For example no manufacturer of protective sheaths can or will give more than a superficial inspection of goods he supplies to the trade, and since these are usually sold to the retailer ready packed under fancy "guarantee" a percentage of defectives is inevitable.

Under the individual tests made by us we definitely state that our experience proves this percentage of defectives to be, at its lowest average 17%.

¶ The Robilton Co's policy of security to the purchaser has resulted in support not only from the medical profession but from various well-known Societies connected with the Birth Control Movement, who voluntarily recommend the Agency as one in which full confidence may be placed. *Furthermore the Robilton Coy. possess the only authoritative recommendation ever made by the Council of the Malthusian League to a commercial firm.*

¶ The Agency serves customers in New Zealand, Tahiti, India, Canada, U.S.A., British Honduras, Egypt, Algeria, South Africa, France, Germany, China, Rhodesia, Switzerland, Mexico, Cuba, etc., and this fact, combined with a steadily increasing connection in Gt. Britain amply supports our claim that

YOU ARE SAFE

WOMEN GETTING EDUCATION

Sir,

It seems strange to think that much for birth control and abortion has come not from men. The reason is after many ages men have known that they get them a great deal of pleasure and those who pay for it usually had no trouble in getting it if they wanted. But until recently very few men, other than professional prostitutes, knew how they might obtain from the sexual act the greatest pleasure. Now great numbers of women, even the better educated classes, have found that the pleasures have been missing so long, and they say that it is just and reasonable for our brothers and for us, but there is the trouble that in our future we may follow and prove very inconvenient and dangerous to some of us. Why should the pleasures associated with sexual pleasure in only one sex? We know it can be avoided or averted. If we could for this the two sexes will have equal pleasure in enjoying what one sex has always known to be the most intense of all pleasures."

It is all very well to call this hedonism or any other name taken from the classics, but only those who have never had experience of it are likely to deny that the facts are as I say. Those who have had no experience cannot say anything on the matter, for they can only quote what they have heard from others, and "*hearsay is not evidence*," except in the case of a witness, but they can be cross-examined as to the grounds on which the opinion they have given is based. We have wondered on what grounds celibate men have arrived at their conclusions. They cannot say anything but are they depending on what they have heard?

Yours

G

RAILWAYMEN AND BIRTH CONTROL

We have lately had many inquiries from railwaymen about birth control. They are quite right in that subject, for the whole tendency is to diminish the demand for railway work. Many branches have been closed by competition from omnibuses, and now there is a move on hand for a complete elimination of competition between railways and omnibuses. That will mean the complete elimination of competition between railwaymen and busmen.
