

Safeguard Your Health

There is no doubt that ONA *Liquid Latex* Preventives are the finest that have ever been produced.

They are manufactured under secret patent processes from *Liquid Latex*. This material offers many advantages as compared with the ordinary rubber, these being enumerated as follows:—

(1) The most serious defect of the gasoline rubber type is that in use they produce a marked sense of "interference." They have a "deadening" and "insulating" effect, which is not only objectionable—particularly to sensitive and highly-strung people—but which at the same time is definitely harmful to the nervous system, resulting often in a state of serious mental stress and nervous disorder. None of these defects is attached to Ona *Liquid Latex* Preventives. *Liquid Latex* possesses the remarkable property of being *definitely conductive and highly sensitive*. They are thus practically *imperceptible in use* and ensure *complete satisfaction*.

(2) The tensile strength of Ona *Liquid Latex* Products made under this patent process is infinitely greater than that of ordinary rubber. It is therefore possible to manufacture preventives that are far stronger than ordinary rubber goods of twice their thickness.

(3) Ona *Liquid Latex* Preventives are guaranteed to keep in perfect condition for five years. Therefore there is positively no danger whatsoever of the preventive breaking or the material perishing even if required for use a considerable time after purchase.

A further important feature with ONA is that each protective is doubly tested with compressed air at the factory, as a result of which every article is guaranteed free of pinholes and/or other defects.

Always insist upon Ona British Made *Liquid Latex* Preventives. They will suit you far better and remember that each and every article carries with it the reputation of a Firm who have specialized in these goods for over a quarter of a century.

ONA *Liquid Latex* PREVENTIVES

THE BEST YET!

MADE IN ENGLAND.

NOTE.—As with many other good things there are plenty of imitations. Wise people will, however, always insist upon the original and only genuine Ona *Liquid Latex* Preventives. There are no others "just as good," because the proprietors' process of manufacture is a patented one which therefore cannot be imitated.
