

Spare your Nervous System by using

MORFI

the product of a long practical experience.

Judging only by its appearance the silken fineness of "MORFI" is already a testimonial of a most exquisite make but its exceptional durability and reliability are further results of our special manufacturing methods and the particular care we devote upon various tests.

Our special brand "MORFI" is indispensable to sensitive, nervous and overstrained men as it is well known that nowadays almost every man is sensitive, nervous or overstrained. If you are however an exception to this rule you should nevertheless continue to use "MORFI" in order to protect your nervous system in a hygienic way and so be able to keep up your social standard.

Did you never notice that sometimes you were dissatisfied even with yourself, your work and your surroundings and that for several days you were suffering under an apparently unfounded psychic depression. Did you ever attempt to find out the reason of this condition? If you did not, we may tell you that the quality of the preventatives which you might have used at that time were probably the hidden cause of your feeling depressed, unfit for work and in an excited and nervous mood as either had those preventatives been dipped too much or unevenly and in both cases were therefore too thick thus impairing your natural feeling, or they were not reliable enough causing you, in consequence of the bad experience you had made, to exercise a certain amount of restraint and thus spoiled the pleasure you had longed for.

Such unpleasant happenings need not be feared when using our special brand "MORFI" which is the product of a long practical experience.

Our special brand "MORFI" is an important achievement not only for men but for women as well because by using preventatives which have been dipped too much or unevenly, which are ribbed or grooved, in one word which are too thick, you frequently cause in the woman's organism inflammations which in addition to being very painful may lead to consequences injuring the health of both parties.

It is scientifically well known that a woman's pleasure reaches the highest point when the womb tries to take in the semen, and with our special brand "MORFI" you allow the woman the natural feeling whereas by using preventatives which are

unevenly dipped or too thick you not only impair her pleasure but also prevent the developing of her natural feeling thus causing the undesired consequence of not assimilating at the same moment.

You are now going to use our special brand „MORFI“ and you will very soon find out that we did not exaggerate.

We give full guarantee for the quality of our special brand „MORFI“, and we can do so because we are its manufacturers and not dealers who one day buy their goods from one rubber manufacturer and the other day from another.

Our interest is based on keeping the quality of our special brand „MORFI“ continually on the same high level as we attach the highest importance to maintaining the prestige and the good name which our firm is enjoying all over the world.

Most people are not aware of the pains and injuries they may cause to their body by falling a victim to the lure of cheap offers and by purchasing inferior preventatives, but if you continually use our special brand „MORFI“ the product of a long practical experience you will always be spared troubles and disappointment.

DIRECTIONS FOR USE

A „MORFI“ preventative is always ready for use as it has been produced by the most up-to-date technical process and, before leaving the works, has been carefully tested three times thus obviating a renewed testing. On the contrary, such renewed testing should be strongly refrained from as any wrong or inapt handling may damage the very sensitive silken rubber thus entailing disadvantages to the user. Numerous letters of praise regarding the excellent quality of our „MORFI“ which were sent to us spontaneously are best proof of their popularity.

The „MORFI“ preventatives are thus rolled over the organ so as to leave an empty space of about half an inch at closed end. Subsequently the preventative rolled over the organ should be moistened before the intercourse thus preserving the natural feeling and, even if the vagina is dry, protect the rubber from tearing. We advise you not to use saliva for moistening as same is readily conveying germs of disease.

You should of course, be aware that you may infect yourself before using a preventative as the slightest touch suffices for infection.

To avoid misleading and inferior imitations we have enclosed in each box a prescription which enables you to obtain our genuine special brand „MORFI“ in a discreet way from all first class retailers.

„MORFI“ PRODUCTS are made in our well known FROMMS ACT WORKS which in the judgement of competent experts and medical authorities rank amongst the most modern and hygienic accommodations for the manufacture of Surgical Rubber Goods.
